

Taking Action For Tynemouth

If elected as your councillor I will be...

- Fighting for a more comprehensive recycling policy, including the extension of garden waste recycling to 'new builds'
- Working with businesses to reduce their carbon footprints and plastic waste
- Fighting fly-tipping and waste crime
- Working with community groups to fight littering and promote taking care of our ward

Let's work together to ensure a clean, green future for Tynemouth & North Shields.

Tynemouth & North Shields Labour News

My name is Tricia Neira and I am your local Labour candidate for 2020. I have lived in this ward for 9 years, with my three children who attend Kings Priory School. We live very close to Northumberland Park where my children have spent many happy hours, I have also observed first-hand the impact that littering and fly-tipping have had in our area.

Improving Northumberland Park

Despite drastic Tory cuts your Labour council has worked hard to protect our green spaces, delivering a £4m regeneration to Northumberland Park, improving play equipment and providing a vital 'escape to nature' of which all residents can be proud.

Enjoying Northumberland Park

Protecting Our Beaches

We have also been protecting beaches by deploying Beach Wardens and beach cleaning throughout the summer. This not only keeps our beaches Blue Flag award-winning, it also protects our marine life from plastic pollution.

Litter-pick last summer**

Fighting Fly-tipping

We are aware of the impact of fly-tipping in our ward. It is ugly, unsafe and illegal.

Our Community Protection team are fighting fly-tipping, imposing Fixed Penalty Notices and prosecuting offenders.

**Taking action against fly-tipping
to protect people and environment**

Reducing Pollution

Tynemouth were first in the region to achieve Plastic-Free status and we are building on that success now, working with businesses towards further reductions in single-use plastics and their environmental impact.

I met with local businesses to discuss their environmental priorities and what support they need from the council to ensure the changes they make have a real impact in reducing pollution.

The Tories Cannot Be Trusted!

Pollution and environmental damage threaten the health and happiness of future generations and this issue has become urgent.

The Tories have scrapped their commitments to EU environmental protections and their record of support for oil-drilling and road-building show that they are not thinking of a greener future. They have shown that they cannot be trusted to protect our environment.
